Capitalism Lab is an educational game created by the free software company, EconKids. It is designed to teach high school students about capitalism and how markets work. Capitalism Lab delves into different economic concepts such as supply and demand, production, distribution of goods, the marginal utility of goods and services, comparative advantage, opportunity cost etc. The game can be run in almost any PC environment that supports Java 2 version 1.4 or later which supports Windows 98 or later operating systems. The game was released under the GNU GPL license version 2 on 2004-04-14. The code for Capitalism Lab is available here .

Capitalism Lab received good ratings from reviewers like Dr. Stephen L. Talbott, who gave the game a B rating, and Daniel Mitchell, who gave it an A rating. After playing it for two weeks, Dr. Talbott rated the game with the following statement: "As a game designed to teach economics, which I don't myself understand very well, Capitalism Lab is pretty good." The game has received positive reviews from education experts like Peter Kuckelman of "School Library Journal". He says that "Capitalism Lab is an important contribution... This is an outstanding way to introduce modern economic issues to beginning-level students... This is an excellent resource for ...economics instruction.
